

Ketchum Tamperproof Cattle Ear Tag

Please follow this guide to ensure the tag is fitted correctly

Step 1

Ensure you have the requisite tag and plier to perform the task

Step 2

Insert the tag into the pliers and seat into the indent. Ensure the tag is seated correctly against the jaws.

Step 3

Manipulate the pliers with a quick CLOSURE SQUEEZE without any pull towards the operator's body until the tag is clinched.

Step 4

Once closed the tag will have securely locked into place.

Important - When fixing tags to young stock, room must be allowed for growth of ears
If you require the RPA Eartag Feedback Form, please contact your supplier direct
