

JUNIOR APPLICATOR - For All Combi 2000® Ear Tags

Please follow this guide to ensure the tag is fitted correctly

Note: when applying electronic tags, remove the black piece from the bottom jaw

Step 1

Locate the female part under the correct clip. The back of the female tag slots into the applicator.

Step 2

Locate the male part of the tag into the applicator pin and seat correctly.

Step 3

Line up the male and female parts of the tag and squeeze the applicator to clip together.

Step 4

Once the tag is applied, release the handle, to allow the male part of the applicator to retract.

Important - When fixing tags to young stock, room must be allowed for growth of ears
